

ENABLE Scotland's money

Last year ENABLE Scotland received 30 million pounds.

Last year ENABLE Scotland spent 31 million pounds.

So last year ENABLE Scotland spent more money than it received.

ENABLE Scotland spent 1 million pounds more than it received.

There are 3 reasons why ENABLE Scotland spent more than it received.

Reason 1

Local councils give ENABLE Scotland money to support people.

But last year local councils gave ENABLE less money to support people.

Reason 2

ENABLE Scotland makes money through fundraising.

This is things like...

- people raising money for ENABLE
- ENABLE putting on events where people give money
- people leaving money to ENABLE when they die
- ENABLE applying for money from places like the Big Lottery Fund.

Last year ENABLE found it harder to make money through fundraising than we have done before.

Reason 3

ENABLE Scotland has to pay tax to the government.

Last year ENABLE was told we will have to pay a big tax bill all at once.

We will have to pay this money to the government soon.

But ENABLE will not have to pay this big tax bill again next year.

ENABLE Scotland is working very hard to make things better.

ENABLE is working hard to make sure we do not spend more than we have next year.
